SATNAV TR9 6DH

Camel Trail from Wadebridge to Wenford Bridge

IMPORTANT NOTE: This indicative guide has been produced in this format so the 11.5 mile Trail from Wadebridge to Wenford Bridge can fit on this sheet. The distance from Wadebridge to Wenford Bridge using the public highway is 8 miles, and is not recommended for cyclists and walkers.

Wenford Dries
The Wenford Clay Dries were built in the early part of the 20th century as part of the china clay factory. Clay slurry was piped from the pit at Stannaton to the dries. Apart from a short period of closure during the Second World War it is understood the dries were in use until 2002.

Red Deer
Often spotted on Bodmin Moor the Red Deer is the UK's largest land mammal. Their summer coat is reddish brown to brown, and their winter coat is brown to grey. Large males can be easily identified by their highly branched antlers.

Common Lizard
Commonly found near water or moorland and they are particularly fond of warm places. They also like basking and can sometimes be found on the stone ballast around railway lines. The male lizard is usually brown in colour and the female often has dark stripes.

Barn Owl
With its long wings and long legs it can be distinguished from other owls due to its short and squarish tail. It can measure between 25 and 45 cm in length with a wingspan between 70 and 110 cm.

Kingfisher
A brightly coloured bird with a long pointed beak and large head. Often found near water as they feed on fish as well as insects. They nest in cavities such as holes in trees or in tunnels in the river banks.

Wenford Bridge
To St Brevard 2.6km

Wadebridge
To A39 and Camelford

Camel Trail
